['one', 'two', 'three', 'four', 'five']

14. Write a script to print all the values in the array except value 'three'
15. Write a script to print all the values and stop after value 'four'

$str = "It is a long established fact that abc a reader will be distracted by the readable content of a page when abc looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using abc 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors abc now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will abc uncover many web abc sites still in their infancy. Various versions abc have evolved over abc the years, sometimes by accident, sometimes abc on purpose (injected humour and the like).";

Write a script to remove bad words 'abc' but don't use str_replace or any built-in function do it yourself
